

**Arash Esnaashari**

19 y/o Front-end Developer

919 800 3528

Tehran

## Education

Kharazmi University  
Computer Science 2026

Alborz High School  
Math and Physics 2022

## Skills

JavaScript

React

Design

Relative to Front-end

I have a good understanding on

## Soft Skills

- While working for two startups, I consistently encountered challenges that taught me the value of being a hardworking individual. It instilled in me the ability to learn quickly and complete tasks efficiently, especially since we maintained an active online community of users.
- My previous experience working at Mori taught me how to stay on track, refining my time management skills, enhancing my communication abilities, and effectively collaborating as a team member. We employed agile and scrum methodologies, deepening my understanding of software development as a collective effort.
- The reason I am applying for this job is to gain experience working in large teams and learn more from my colleagues.
- The extroverted side of my personality always loves to communicate with people, and I believe having new colleagues is the biggest advantage of this job :))

## Work Experience

**Mori**

remix react chakra docker python couchbase

I worked as frontend developer there, Throughout one year of hardwork I assisted my team by collaborating with our product manager and product designer to build the entire website. additionally I worked on some of our backend services

**Ussistant**

**Ussistant**

remix react chakra fastAPI

The project involved creating a platform to collect users' voices and empower our AI. I developed a platform where users could record their voices online and another space for annotators to annotate those files

## Projects

**Bookgram**

nextjs nodejs mongodb contextApi responsive tailwind swr

Blog + Ecommerce where you can read and share your idea about books

**Social Media**

nextjs nodejs mongodb contextApi tailwind iron-session

Social Media for sharing gradient design
